

ENVIRONMENTAL POLICY

The Management of IQS Srl is fully aware that a responsible economic strategy addressing environmental issues arising from its operations is essential to its success and that of its customers.

It also recognizes that continuous improvement of its environmental performance leads to significant commercial and economic benefits, while also meeting the improvement expectations of the local context in which the Company operates.

Therefore, IQS Srl is committed to pursuing a policy of continuous improvement of its environmental performance, minimizing, where technically possible and economically viable, any negative impact of its activities.

It intends to achieve the above-mentioned goals through the following actions:

- a) ensuring that its activities are conducted in compliance with applicable national and/or local laws and any codes of practice it has subscribed to;
- b) implement and maintain an effective Corporate Management System in accordance with the requirements of UNI EN ISO 14001 standard.
- c) make every organizational, operational, and technological effort to prevent environmental pollution;
- d) optimize energy and water consumption and waste generation, promoting waste recovery where possible;
- e) define objectives and targets, to be integrated with site operational management and corporate development programs;
- f) ensure that the Environmental Policy set forth herein and the related management system are understood, implemented, and maintained at all levels of the organization and that the system is supported by periodic and systematic training and education activities;
- g) ensure that this document is also available to the public.

The Management conducts periodic reviews, promotes improvement actions for the subsequent period, and verifies the continued relevance of this policy to the strategic objectives.
